

GTCASA Saturday Club Term 4 2017 5-8 year olds

Saturday 28th October 2-4pm

What's a plant made of?

- * Interactive discussion about the different parts of plants and how they work.
- * Making your own plant – Different dried plant materials will be provided and students will get creative and make their own plant

Students will learn about the different plant parts and how humans use them. This lesson is about connecting what we see on our plate with where it comes from e.g. carrots = roots, beans = seeds, lettuce = leaves etc.

Saturday 11th November 2-4pm

The challenges of feeding the world

- * Learn about the different “bugs & grubs” e.g. insects, beetles and worms
- * Discuss how these bugs affect our food
- * Getting crafty and making some bugs

Plant pests, let's learn about who they are and what they do to our food.

Saturday 25th November 2-4pm:

Looking closely at our food

- * Using microscopes to investigate: different seeds and cereal grains, and different breakfast cereals
- * Discuss how processing affects food

Do different seeds look different? How about the foods that they end up in?

Saturday 9th December 2-4pm

Where does your breakfast come from?

- * Let's learn about what plants need to grow
- * Building a terrarium to grow some plants

Where does your food come from and what do plants need to grow? Students will get to make a terrarium and grow a few different plants to observe the differences.

Ages:	5-8 years old (but open to others close to this particularly interested in the topic)
Dates:	Saturday October 28th, November 11 and 25th and December 9th 2017
